MASTER OF SCIENCE IN APPLIED GLOBE SECURITY

Advance your cybersecurity career with Shenandoah's fully online, 16-month MS in Applied Cybersecurity degree. Prepare to lead teams of cybersecurity specialists or expand your knowledge to implement enterprise cybersecurity policies and conduct incident investigations. The curriculum is designed to prepare you to take the CISSP certification exam. The applied nature of the program ensures that you are ready to solve real-world problems in the workplace.

This degree is intended for applicants with:

An undergraduate major in computer science, cybersecurity, information technology, information systems OR

A major in a related area with prior coursework in cybersecurity fundamentals, operating systems, networking and programming.
